## Bucket Corner Protectors

### Quality design. Dependable results.

Even the toughest buckets undergo severe punishment in normal applications. That's why it is important to protect bucket corners from unnecessary wear. The new sharper corner protectors reduce wear and protect critical areas of the bucket, ensuring corner adapters fit properly when used. The corner adapter bolt holes align with the corner protector bolt holes, simplifying installation of cutting edges.

Made from DH-2 steel and through hardened for optimum strength, the corner protectors are built to last. The sharper profile increases penetration and production by funneling loose material into the center of the bucket.

**Caterpillar. The difference counts.™**

Cat® Dealers define world-class product support. We offer you the right parts and service solutions, when and where you need them.

The Cat Dealer network of highly trained experts keeps your entire fleet up and running to maximize your equipment investment.

# Cat Bucket Corner Protectors

Individual Protectors

The bucket corner protectors are for use on J250-J460 corner guard system 2-bolt corners when using bolt-on cutting edges on selected wheel loaders.

## Better protection. Better performance.

- Penetrates better
- Funnels material flow into bucket
- Increases productivity
- Increases wear protection
- Eliminates gaps between sidebar protector and corner guards

Model	Corner Adapter Size	Increased Wear Material
924G, 928G, 930G, 938G	J250	20%
950G, 953C, 960F, 962G	J300	19%
962G, 963C, 966G, 972G, 973C	J350	27%
980F, 980G, 980H, 988G, 988H	J400/J460	86%

Compare the two. The new corner protector on the left provides ultimate protection while enhancing performance.

After sharper corner protectors were installed, the 950G with a general-purpose bucket realized a 6% increase in productivity (cost per ton, per hour) and a 7% increase in fuel efficiency in aggressive truck loading of aggregate material.
